The Cinegy Process Coordination Service provides centralized storage for all resources types used in your media processing workflow and also acts as a central discovery service.

Chapter 1. Cinegy Process Coordination Service 4 Release

Cinegy PCS Release: 4

Cinegy PCS Build: 4.65.0.641

Release Date: September 30, 2021

Prior to starting the Cinegy Process Coordination Service v4 installation, it is recommended to uninstall any previous versions of the Cinegy PCS that may be present on your machine, reboot your OS and check on Windows Services Manager that "CinegyProcessCoordinationService" has been properly removed.

To complete the Cinegy PCS installation, the OS reboot is required.

1.1. Important Changes and Fixes

- administrator rights are no longer required to apply changed settings in the configurator
- added support in Cinegy Convert Client for a direct tasks queue to the PCS without watch folders
- added task filtering by name, server, status, creation time, start time or end time
- improved order of processing tasks by Cinegy Convert Agent (defect 14397)
- fixed issue with memory leak when monitoring tasks in Cinegy Convert Monitor (defect 14061)
- fixed issue with presence of finished tasks in the "Queue" tab of Cinegy Convert Monitor (defects 14095, 14367, ticket EPY-756-88933)
- various interface improvements (defect 14438)
- minor bugfixes and improvements (defect 8797)
