Cinegy Archive Service 25 Release 1

Cinegy Archive Service Release: 25 R1

Cinegy Archive Service Build: 25.5.24.9201

Compatible with Database: mam15, mam16

Release Date: August 12, 2025

Important Changes and Fixes

The Cinegy Archive Service is now supplied separately with a custom installer.

- supported CLI-driven mode that allows CAS to run inside a CAS Core Windows container without GUI elements (US 7035)
- extended REST API to make it possible for assets stored on object storage/within Cinegy Cloud to be used for storage without a NAS (US 7276)
- updated CAS export capabilities to support .NET 6 and Linux (USs 7247, 7129)
- ported outdated CAS functionality to net standard / net core (US 7094)
- increased REST API call timeout for searching for Traffic ID on Cinegy Convert import to Archive tasks (defect 14597, ticket QZL-755-36067)
- excluded a "Video" group in the timeline from exported audio-only clips (defect 16990)
- improved positioning of graphics and title nodes upon creation
- fixed issue when MAMs is deleted after the CAS installation (defect 15488)
- fixed possible issue that occurs when updating placeholders via Cinegy Convert (defect 15495)
- fixed issue with support of audio-only clips (defect 16978, ticket AFQ-535-73628)
- fixed occasional registration of "GetFilesPath" deadlock error messages in the CAS log during importing of multiple .CineLink files with 8+ audio tracks through Cinegy Convert (defect 16759, ticket BJC-503-31387)
- fixed issue where CAS continued running as Windows service after the application was uninstalled (defect 17297)
- fixed issue that prevented changes made in CAS configurator from being applied (defect 17038)
- fixed issue with the missing "Run-time parameters" section (defect 17299)
- fixed issue with XML export (defect 17042)
- fixed issue with launching the configurator (defect 15448)
- imprinted CAS version information across the project
- rebranded the application icon (US 7628)

Known Limitations

These limitations will be addressed in the next releases.

- Index rebuilding performed during the database upgrade via Cinegy Archive Database Wizard on large databases may be interrupted due to a timeout.
- Before installing the Cinegy Archive Service v25, it is required to uninstall previous versions of Cinegy Archive components and install the Cinegy License Service included in the Cinegy Archive installation package.
