Cinegy Stream Switcher 10.0

Cinegy Stream Switcher Release: 10.0

Cinegy Stream Switcher Build: 10.0.0.1727.11089

Release Date: September 24, 2014

Cinegy Stream Switcher is an automatic system to support failover configuration in IP domains. It is used for automatic RTP streams switching in redundant configurations. It works with any external system that generates RTP streams intended to be monitored.

For help and support please contact the Cinegy Support Team via the e-mail address.

Major Improvements

- the receiving RTP-packets stability is improved
- the switching between the specific H.264 streams issue is fixed
- the automatic switching between sources issue is fixed
- the application logging is improved
- the dump files generation is implemented
- the service stop while working in service mode issue is fixed
